

AUTO LEVELING KIT

Increases overall machine stability, by allowing the suspension to automatically react to the road and field conditions.

Helps maintain a consistent boom height by compensating for the weight of a full or empty solution tank.

Increase ride comfort by maximizing the full suspension travel.

Eliminating the need to manually adjust the airbags.

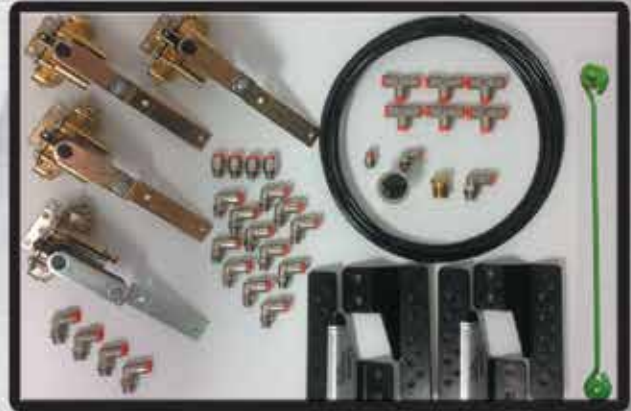

Incorporates a switch to allow dumping air from the airbags to lower machine height to aid in loading chemical and for transporting by float.

Adjustable Lift Brackets are included to fine tune your suspension in half inch increments and can provide up to an additional five inches of ground clearance.

Includes everything required to update your sprayer to an automatic leveling air bag system.

Kit Includes:

- 4 leveling valves
- All required fittings
- 4 linkage rods
- Simon Innovations adjustable lift brackets
- In cab air switch (dump valve)
- Air line
- Plumbing map
