

# BOOM NEST GUARD

Includes everything required to update your sprayer to

**Boom Nest Guards protect the boom and cradle from excessive wear.**

**Once the cradle and boom surfaces become burred or rough, raising the boom out of the cradle becomes difficult.**

**Boom Nest Guards are designed to slide, roll, and cushion, mating boom surfaces preventing metal to metal contact.**

**The kit includes low profile, machined aluminum retaining collars with stainless steel screws to act as a cap that capture the guards onto the boom while still allowing the guards to slide during folding and unfolding.**

**These guards are made of wearable material that install and removes in minutes to allow for easy replacement.**

## The Kit Includes:

- 2- Sets of guards ( 4 pieces )
- 2- Machined aluminum retaining collars with stainless steel bolts.

**This picture illustrates a new boom guard and retaining collar installed.**

**The guard above was removed after 100 hrs. of use to illustrate the amount of wear these surfaces endure.**
