

# HUB COVERS

Prevent Crop Damage  
from Wheel Hubs

**"SAVE BUSHEL PER ACRE"**

#### The Benefits

- Prevent crop damage.
- Provides a smooth surface to deflect crops away from wheel hubs, rims and lug nuts.
- Machine is easier to steer down rows.
- Installs in minutes.
- Flush mount design and covers the entire rim.

#### APPLICATIONS:

**HERBICIDE / INSECTICIDE / FUNGICIDE / FERTILIZER**

#### Sets Available For:

John Deere Models: 4710, 4720, 4730, 4830  
4930, 4940, R4030, R4038, R4044  
and the New 408R, 410R & 412R

- Hub covers are constructed from a very durable polyethylene material.
- They have a directional louver molded into each hub cover to allow air to circulate behind the cover.
- The outer diameter of the hub cover seats securely in the bead of the rim.

- Corn
- Soybeans
- Wheat
- Canola
- Tomatoes
- Sunflowers
- Potatoes
- Cotton
- Sugar cane
- Sorghum
- Berries
- Tobacco

Durable powder coated spacers fasten to the remaining wheel studs that protrude beyond the wheel nuts and are machined to extend beyond the end of the hub providing a sturdy mounting surface utilizing our custom zinc coated mounting hardware.
