

REVERSING FANS

Simon Innovations is proud to offer our customers a new product that will keep your Sprayers Radiator clean during this **"Fungicide Spraying Season"**.

Reversing fan kits come equipped with a timer control & manual control switch that will reverse the airflow, to powerfully clean your radiators & screens.

A design that has been created to optimally align the blades and allow for maximum cooling and airflow. Simon Innovations understands the importance of being able to have control right from the seat of your cab, offering operators the ability to clean their radiators & screens while allowing more **productivity, reliability and fuel efficiency** in the field.

Convenience=Productivity!

A Clean Radiator Saves Fuel, Time & Protects it from Overheating!

Increases Power

Noise Reduction

Fuel Savings

Reduces Downtime

Cooling

Reverse through the cross position

This Guarantees Pressure Cleaning!
