

SUSPENSION KITS

Pneumatic Lift Kit

Increases ground clearance an additional 5 inches on demand. A flick of an in-cab switch allows the operator to select between stock ride height "road mode" and lifted height "field mode" to gain additional crop clearance.

This kit includes:

- 4 pneumatic cylinders
- 4 adjustable base brackets (3/8" increments)
- Air switch (to be mounted in cab)
- Air line
- All required air fittings
- Plumbing map

**New R-Series Suspension Kit
up to 80" of clearance**

Lift Brackets - Manually adjustable

- Direct factory replacement to the stock air bag linkage mounting bracket.
- Various linkage mounting holes allow the stock linkage to be adjusted to gain up to 5" of additional ground clearance.
- The factory ride height is maintained using the bottom holes while the upper holes allow options in 1/2" increments.
- Laser cut and CNC bent to ensure a consistent and precise fit
- Powder coated for a long lasting and durable finish
- Install / Remove in minutes
